This program is “field-initiated” in that proposal submissions are not in response to a specific request for a particular research topic, discipline, design, method, or location. We accept Intent to Apply forms once a year in this program.

We view partnerships as an important approach to knowledge generation and the improvement of education, broadly construed. Over the long term, we anticipate that research conducted by RPPs will result in new insights into the processes, practices, and policies that improve education for learners, educators, families, communities, and institutions where learning and teaching happen (e.g., schools, universities, museums, other workplaces).
